Dominos Clock

Materials

- Acrylic paint (whatever colour you want)
- Paint brush
- Large wooden circle (approx. 29cms) with hole in the middle
- Dominos (note: this works just as well with dice, e.g., two 6's for the number twelve)
- Strong glue
- Clock mechanism movement with hands
- AA Battery
- Pliers

Process

Step 1

Paint the clock face. ALLOW TO DRY.

(Ignore the clock mechanism in the middle; this came with the clock face and will be taken out to put a working one in later.)

Step 2

Choose and arrange your dominos. Then glue each one to the clock face.

Step 3

Attach the clock mechanism and hands. Insert the AA battery.

(Try to avoid using hands that are the same colour as your clock face. I had to paint the hands white to resolve this mistake)

Hang on the wall.
